

Electronic candle systems have become a common and acknowledged substitute for votive candles traditionally used in Parishes, Hospitals and Shrines, eliminating the costs of labor, the threat of fire and smoke hazards culminating in an overall improved environment while still permitting individual to show their intentions by lighting a candle. It is also a revenue profit center.

In such environments this is an important expression of an individuals belief in tim of stress and the unknown.

In anticipation of the increased demand for such a spiritual need, the desire to light a votive candle as an intention is stronger than ever and Gabriel assists in having that intention used in the Church, Shrine or Mausoleum.
